Description			
When typing the password and pressing ENTER in the TYPO3 v11 installation process, the password becomes visible instead of the form gets sent. When being in the TYPO3 backend login mask, typing the password and pressing ENTER sends the form. I guess, this is the expected behavior.

[TASK] Remove inline JavaScript from Install Tool

Removes inline JavaScript from installer step
"Create Administrative User & Specify Site Name".

Also mark button as type="button" to avoid intercepting
the form submit due to the toggling event handler.
