

TYPO3 Core - Bug #95361

CSH popup window loads the whole TYPO3 backend

Target version:		Complexity:	
TYPO3 Version:	11	Is Regression:	
PHP Version:	7.4	Sprint Focus:	
Tags:	CSH, UI, Popup		
Description			
- Only present on latest master (11.5.0-dev), not present on 10.4.21			
steps to reproduce			
1) Latest TYPO3 master (11.5.0-dev) 2) Edit a page or a content element 3) click on the title of a field where the CSH (Content Sensitive Help) is present, e.g. the content header or content columns - you can recognize them as the cursor becomes a question mark. 4) Click again on the small popover to bring up the CSH popup window (the cursor becomes a hand when present)			
Current result			
The popup opens with the whole TYPO3 backend inside, header bar and left modules bar (no pagetree), and as the window is small, the central area is greyed out. See attached screenshot			
Expected result			
Just the content area should be loaded, no need for the header bar or the left modules bar.

Revision 3757e629 - 2022-02-20 12:24 - Benjamin Franzke

[BUGFIX] Show CSH popup window without backend frame

Since #94084 all module URLs are automatically framed by the TYPO3 main controller whenever they are opened in a Sec-Fetch-Dest aware request.

Use a non-module route for the popup window in order to avoid the automatic re-framing.

Also hide the back-button in the popup window, as it would cause the entire backend to be opened in the popup. The shortcut button will link to the module-based detail-action in order to show in regular module context.
