[~TASK] FLOW3 (Cache): Fixed a failing APC backend test

One test was failing, probably due to an old APC version used (see #9538). After upgrading to a more recent version of APC (3.1.5-dev) this other tests failed due to the cache slam prevention mechanism.

Since that cannot be disabled (currently) via ini\_set(), these tests are now skipped if apc.slam\_defense is set to 1.

Relates to: #4855  
Resolves: #9538

##### #3 - 2010-08-31 15:44 - Karsten Dambekalns

Please try with 3.1.4 or newer.

##### #4 - 2010-09-02 16:06 - Robert Lemke

With 3.1.5-dev the mentioned error is gone.

However, with the default php.ini settings I now get:

```
59 Error in itIsPossibleToOverwriteAnEntryInTheCache
/opt/local/apache2/htdocs/Development/FLOW3/Distributions/Base/Packages/Framework/FLOW3/Classes/Cache/Backend/
```

ApcBackend.php:276

Warning: apc\_store() [

Error in flushRemovesAllCacheEntries
