

TYPO3 Core - Bug #95927

scheduler task (TestTask) is not logging /creating log entries when executed (v10 and v11)

Description

I've had this issue in TYPO3 10.4 and 11.5

The Test Task (sysex\scheduler\Classes\Example\TestTask.php) in scheduler sends an email, it should also create a log entry while doing so:

10.4

```
$this->logger->info(['TYPO3\CMS\Scheduler\Example\TestTask]: Test email sent to "' . $this->email . '");
```

11.5

```
$this->logger->info(['TYPO3\CMS\Scheduler\Example\TestTask]: Test email sent to "{email}"', ['email' => $this->email]);
```

However, the backend log module doesn't show this log entry.

The log is working, it shows logs like "Scheduler task "Scheduler test task" (UID: 1, Class: "TYPO3\CMS\Scheduler\Example\TestTask") was added" or "User xxx logged in from 0.0.0.0"

Am I missing something?

History

#1 - 2021-11-10 07:16 - Georg Ringer

- TYPO3 Version changed from 11 to 10

#2 - 2021-11-10 15:16 - Georg Ringer

- Status changed from New to Needs Feedback

The logging framework (See <https://docs.typo3.org/m/typo3/reference-coreapi/master/en-us/ApiOverview/Logging/Index.html> for more information) does not automatically log into the database (which you know from the log backend module).

if you either change the ->info to ->warning in the TestTask or adopt the configuration in the LocalConfiguration or AdditionalConfiguration you will get an entry in var/log/typo3_*****.log like

```
Wed, 10 Nov 2021 16:12:27 +0100 [WARNING] request="e1ec9048982ac" component="TYPO3\CMS\Scheduler.Task\AbstractTask":  
[TYPO3\CMS\Scheduler\Example\TestTask]: Test email sent to "fo@bar.com" - {"email":"fo@bar.com"}
```

does this information help and can I close the issue?

#3 - 2021-11-10 18:45 - Marco H

- Priority changed from Should have to -- undefined --

Oh, you're right. I wasn't aware that the logs are independent from each other.
So it was my fault - you can close this, thank you for the explanation.
