Revision 9ea8f5af - 2022-02-14 10:01 - Benjamin Franzke

[BUGFIX] Ensure PageRenderer utility scripts are cache invalidatable

Cache busting parameters need to be added to any JavaScript

resource to force browsers to re-download these files after updates.

JavaScriptItemHandler.js changed between TYPO3 v11.5.3 and v11.5.4 and therefore needs to be updated by browsers. The same fix is applied to requirejs-loader.js as this file changed between v11 and v12.

A micro optimization is made by avoiding that JavaScriptRenderer is created twice during PageRenderer creation.
