[!!!][TASK] Remove handling core caches with 'cache_' prefix

The core related caches have been renamed from 'cache_foo' to 'foo' in v10 already, together with a deprecation fallback. This fallback was planned for removal in v11 already, but has been prolonged to v12 to ease extension usage that want to stay compatible with two core versions.

That fallback is now removed and a note is added to the main 'deprecation removal' ReST file.

[!!!][TASK] Remove legacy ArrayAccess functionality of LinkResult

The introduced LinkResult object and its functionality has had a fallback built via ArrayAccess for the LinkBuilderInterface to be compatible with array-ish LinkResult objects to access the previously returned array until TYPO3 v11 LTS.

This change now removes the legacy layer, as TYPO3 only works with the LinkResult object directly everywhere.
