<b>Description</b>			
As an editor I want to disable/ enable elements of a form. This should be possible for the following elements:			
<ul style="list-style-type: none"><li>• finisher</li><li>• step</li><li>• form element</li><li>• validator</li></ul>			
Disabling such an element:			
<ul style="list-style-type: none"><li>• hides the element in the FE, i.e. the element is not shown/ not executed anymore</li><li>• marks the element as disabled in the BE, i.e. the element is still visible, can be edited and enabled</li></ul>			
Some of those elements can only be added once (e.g. finisher and validators). Disabling such elements does not allow the editor to add a new instance of this element. For example:			
<ul style="list-style-type: none"><li>• The "email to receiver" finisher can only be added once.</li><li>• Disabling this finisher does not allow the editor to add a second finisher of type "email to receiver".</li></ul>			
The following image shows a possible finisher design:
