

TYPO3.Fluid - Bug #9805

Code mismatch in "FormViewHelper.php"?!

2010-09-17 18:18 - Gabriel Kaufmann

Description			
Hello,			
I just found this code, after trying to figure out the PHP-Error			
Fatal error: Call to a member function reset() on a non-object in /[...]/typo3_src-4.4.2/typo3/sysext/fluid/Classes/ViewHelpers/FormViewHelper.php on line 167			
Looking into that file there is the following code:			
<pre>00165 \$uriBuilder = \$this->controllerContext->getUriBuilder(); 00166 \$formActionUri = \$uriBuilder 00167 ->reset() 00168 ->setTargetPageUid(\$this->arguments['pageUid']) 00169 ->setTargetPageType(\$this->arguments['pageType'])</pre>			
Please note the missing variables in front of the class-functions "->" and the missing semicolon. I don't think this can be right - or I missed a change in the PHP-core allowing such things.			
The problem appears after trying to use the "<f:form>[...]</f:form>" tag in a fluid-template. Without using this tags, the template works just fine. So i think this is a bug.

That's correct, it's a chained method call.
