

Semantic Web Integration (v5) - Issues

#	Tracker	Status	Priority	Subject	Assignee	Category	Target version
10963	Story	Accepted	Should have	As Roger I want to use an API to store and retrieve RDF triples			
10962	Story	Accepted	Should have	As Roger I want to use an API to query SPARQL endpoints			
10968	Story	Accepted	Should have	As Roger I want to serialize RDF graphs in different formats (Trurtle, RDF/XML)			
10971	Story	Accepted	Should have	As Roger I want to have a schema for URIs to make them dereferencable			
10965	Story	Accepted	Should have	As Robin I want to use existing ontologies (like dbpedia, GoodRelations)			
10970	Story	Accepted	Should have	As Robin I want to map my content objects an properties to existing vocabularies (Person.name -> foaf:name)			
10969	Story	Accepted	Should have	As Robin I want to import existing graphs into the local triple store			
10961	Story	Accepted	Should have	As Robin I want to have my outputted HTML automatically tagged with RDFa			
10967	Story	Accepted	Should have	As Robin I want to enable page visitors to search for concepts rather than for terms			
10964	Story	Accepted	Should have	As Margarete I want to tag my content with minimal distraction			
10966	Story	Accepted	Should have	As Margarete I want to easily find related content (by author, date, keyword ...)
