

## TYPO3.Flow - Issues

| #    | Tracker       | Status         | Priority    | Subject  | Assignee           | Category    | Target version | Has patch |
|------|---------------|----------------|-------------|--|--------------------|-------------|----------------|-----------|
| 890  | Feature       | New            | Should have | Add priority for advice chains   | Robert Lemke       | AOP         |                |           |
| 1785 | Feature       | New            | Must have   | Automatic garbage collection for expired cache entries   |                    | Cache       |                |           |
| 1856 | Feature       | New            | Should have | The Package Manager checks dependencies between packages on each activation / deactivation           | Christopher Hlubek | Package     |                |           |
| 2817 | Feature       | Needs Feedback | Should have | Provide safeguard for preventing multiple submits of a form  |                    | MVC         |                | No        |
| 2974 | Bug           | New            | Must have   | Aspect / Proxy Cache is not emptied automatically if an interface used for introduction was modified | Robert Lemke       | AOP         |                |           |
| 3153 | Feature       | New            | Should have | Support of action based filter rules defined by annotation.  |                    | MVC         |                |           |
| 3305 | Feature       | Accepted       | Must have   | Unmodified objects retrieved from a repository should not be validated in the controller             | Robert Lemke       | MVC         |                | No        |
| 3306 | Feature       | Accepted       | Should have | Flush routes cache automatically on class file modifications   | Robert Lemke       | MVC         |                |           |
| 3312 | Feature       | Needs Feedback | Should have | Allow for easy logging by annotations  | Robert Lemke       | Log         |                |           |
| 3580 | Feature       | New            | Must have   | Create an administration panel for the FLOW3 Development context                                     |                    | MVC         |                |           |
| 3585 | Major Feature | New            | Should have | Implement support for value objects  |                    |             |                | No        |
| 3587 | Feature       | New            | Could have  | Enforce validation rules for value objects already in constructor                                    |                    | Validation  |                |           |
| 3588 | Feature       | Accepted       | Should have | Support value objects in the Object Factory  | Robert Lemke       | Object      |                |           |
| 3619 | Feature       | New            | Should have | Implement System Policy Support/System Security  | Andreas Förthner   | Security    |                |           |
| 3621 | Feature       | New            | Should have | Implement dynamic firewall filter registration   | Andreas Förthner   | Security    |                |           |
| 3728 | Feature       | New            | Should have | Support arrays of objects as controller arguments  |                    | MVC         |                |           |
| 3755 | Task          | New            | Must have   | Concurrency stress testing and cache mechanism   |                    | - Testing - |                |           |
| 4146 | Feature       | Accepted       | Should have | Support typed parameters for validation  | Karsten Dambekalns | Validation  |                |           |
| 5442 | Feature       | New            | Should have | Destroy session / logout user on deleting an account   | Andreas Förthner   | Security    |                |           |
| 5774 | Feature       | New            | Should have | Package Manager should clear all cache entries tagged with %PACKAGE%                                 |                    | Package     |                |           |
| 6178 | Feature       | New            | Should have | Implement FileType and FileSize validators   |                    | Validation  |                |           |
| 6601 | Task          | On Hold        | Could have  | Introduce a new roles definition syntax including runtime constraints                                | Andreas Förthner   | Security    |                |           |
| 6602 | Feature       | New            | Could have  | Implement after invocation handling  | Andreas Förthner   | Security    |                |           |
| 6603 | Feature       | New            | Must have   | Provide a policy management API  | Andreas Förthner   | Security    |                |           |
| 6712 | Feature       | Accepted       | Should have | Implement mixin support  | Robert Lemke       | AOP         |                |           |
| 8462 | Feature       | New            | Should have | Check subobjects in query rewriting  |                    | Security    |                |           |

| #     | Tracker | Status         | Priority    | Subject  | Assignee           | Category          | Target version | Has patch |
|-------|---------|----------------|-------------|--|--------------------|-------------------|----------------|-----------|
| 8463  | Feature | New            | Should have | Check security policy for objects reconstituted in the session scope   |                    | Security          |                |           |
| 8464  | Feature | New            | Should have | Write settings using the ConfigurationManager  |                    | Configuration     |                | No        |
| 8923  | Task    | Under Review   | Could have  | Provide a Nginx Server Configuration for FLOW3   | Christian Müller   | - Documentation - | 1.1.1          | No        |
| 8981  | Feature | New            | Could have  | Security/Performance: Provide Webserver Configuration file for common webserver - do not use .htaccess   |                    |                   |                |           |
| 9313  | Feature | New            | Should have | Support for currencies   |                    | I18n              |                | No        |
| 9537  | Feature | New            | Should have | Query criterions should be able to compare whole objects   |                    | Persistence       |                |           |
| 9861  | Feature | Needs Feedback | Should have | Leave logging up and running as long as possible   |                    | Log               |                | No        |
| 9968  | Feature | New            | Should have | Promote security publishing configuration automatically when persisting models   | Andreas Förthner   | Security          |                |           |
| 10678 | Bug     | New            | Must have   | ReflectionService doesn't reflect methods of child classes correctly when they get reflected before their parent class in the initialization process |                    | Reflection        |                |           |
| 11039 | Bug     | Needs Feedback | Must have   | Static object container injects properties to result of factory object   |                    |                   |                | No        |
| 13559 | Bug     | Accepted       | Should have | ObjectSerializer failes with persistent objects within arrays  | Karsten Dambekalns | Persistence       |                | No        |
| 25907 | Task    | New            | Should have | Referrer should only contain the URI of the previous request   |                    | MVC               |                |           |
| 25988 | Bug     | New            | Should have | Useless proxies are built for some classes   |                    | Object            |                |           |
| 26745 | Feature | New            | Should have | MVC should know about entities lying in the session  |                    | MVC               |                | No        |
| 26765 | Feature | Accepted       | Should have | Support class schema features for every reflected class  | Karsten Dambekalns | Reflection        |                | No        |
| 26767 | Feature | New            | Should have | Reflection method to get a method return type and documentation  |                    | Reflection        |                |           |
| 26943 | Feature | Needs Feedback | Should have | Add i18n support to domain models  | Karsten Dambekalns | I18n              |                | No        |
| 26986 | Feature | Accepted       | Should have | Debug toolbar  | Christian Müller   |                   |                | No        |
| 27045 | Bug     | New            | Should have | Introduced properties are not available in the reflection service during a compile run   |                    | AOP               |                |           |
| 27088 | Bug     | On Hold        | Should have | initializeObject() is called too early when reconstructing entities  |                    | Object            |                | No        |
| 27322 | Feature | On Hold        | Should have | Add support for Appserver-in-PHP, which could result in much faster executions.  | Christopher Hlubek |                   |                | No        |
| 27379 | Bug     | Needs Feedback | Must have   | add check to clear the database at tearDown in testing   |                    |                   |                | No        |
| 27561 | Task    | Accepted       | Could have  | Complete documentation   |                    | - Documentation - |                | No        |
| 27721 | Bug     | Needs Feedback | Should have | Permissions of uploaded resources not correct  | Karsten Dambekalns | Resource          |                | No        |
| 27798 | Bug     | Accepted       | Must have   | CSRF protection not working for forms in a plugin  |                    | Security          | 2.0.1          | No        |

| #     | Tracker | Status         | Priority    | Subject  | Assignee           | Category          | Target version | Has patch |
|-------|---------|----------------|-------------|--|--------------------|-------------------|----------------|-----------|
| 28016 | Bug     | Needs Feedback | Should have | Cascade remove of cleared ArrayCollection  | Karsten Dambekalns | Persistence       |                | No        |
| 28052 | Feature | On Hold        | Should have | Possibility to enable or disable accounts  | Julian Kleinhans   | Security          |                | No        |
| 28074 | Feature | Needs Feedback | Should have | Provide a shell script that installs Phoenix or FLOW3 from git   | Markus Bucher      |                   |                | No        |
| 28136 | Feature | New            | Should have | HTTP Semantics for Transactions and more   |                    | Persistence       |                | No        |
| 28231 | Feature | New            | Should have | Allow output to STDERR for CLI Response  |                    | MVC               |                |           |
| 28319 | Bug     | Needs Feedback | Should have | Access denied will be logged at the wrong location in nested calls   |                    | Security          |                | No        |
| 28399 | Feature | Needs Feedback | Should have | Validation message and code should be configurable for bundled validators  |                    | Validation        |                | No        |
| 29202 | Task    | New            | Should have | Provide a Cherokee Server Configuration for FLOW3  |                    | - Documentation - |                |           |
| 29258 | Feature | Needs Feedback | Should have | Provide a way to override classes by environment   |                    |                   |                | No        |
| 29387 | Feature | Needs Feedback | Should have | A token with wrong credentials should throw an exception   | Andreas Förthner   | Security          |                |           |
| 29405 | Bug     | New            | Must have   | When storing a new entity inside the session, it will be fully serialized instead of just the reference being stored |                    | Session           |                |           |
| 29425 | Bug     | New            | Should have | Deletion of a blog post with resources fails with FK constraint error  |                    | Persistence       |                |           |
| 29476 | Feature | New            | Should have | Provider rendering time and query count for request  |                    |                   |                |           |
| 29972 | Feature | Under Review   | Should have | Configurable Redirects   | Tim Kandel         | MVC - Routing     |                | No        |
| 30258 | Feature | New            | Should have | Support optional package dependencies  |                    |                   |                |           |
| 30418 | Feature | New            | Should have | Package bootstrapping following dependencies   |                    | Core              |                |           |
| 30423 | Feature | New            | Should have | Rendering template of other action without forward   |                    | MVC               |                | No        |
| 30424 | Bug     | New            | Must have   | Forward object arguments with changes  |                    | MVC               |                |           |
| 30425 | Bug     | New            | Should have | New methods are not updated in Policies during Development   |                    | Security          |                |           |
| 30428 | Feature | New            | Should have | Cloning of request arguments   |                    | MVC               |                |           |
| 30890 | Feature | Accepted       | Should have | Developer Toolbar  | Christian Müller   | MVC               |                | No        |
| 30933 | Feature | Needs Feedback | Should have | Check for unique constraints on add()  | Karsten Dambekalns | Persistence       |                | No        |
| 31002 | Bug     | New            | Should have | Generated __sleep method handles static properties as members.   |                    | Reflection        |                |           |
| 31210 | Bug     | New            | Must have   | constructor of proxy class not compatible with interfaces defening a constructor                                     |                    | Object            |                | No        |
| 31261 | Feature | New            | Should have | Virtual objects - generate proxy classes for interfaces  |                    | Object            |                | No        |
| 31262 | Feature | New            | Should have | Named arguments in Objects.yaml for constructor arguments  |                    | Object            |                | No        |
| 31339 | Task    | On Hold        | Could have  | Search   |                    | - Documentation - |                | No        |

| #     | Tracker       | Status         | Priority    | Subject  | Assignee           | Category   | Target version | Has patch |
|-------|---------------|----------------|-------------|--|--------------------|------------|----------------|-----------|
| 31484 | Feature       | Needs Feedback | Could have  | possibility to modify inner workings of proxy class builder                        |                    |            |                | No        |
| 31500 | Bug           | Under Review   | Must have   | Argument validation for CLI requests is not done                                   | Karsten Dambekalns | Validation |                | No        |
| 32105 | Bug           | New            | Must have   | IgnoreValidation ignored if ACL is set for this controller action                  |                    | Security   |                | No        |
| 32106 | Feature       | Accepted       | Should have | Support for Object source in PropertyMapper  |                    | Property   |                | Yes       |
| 32294 | Feature       | New            | Should have | Lazy initialization of loggers   |                    |            |                | No        |
