

## TYPO3.Fluid - Issues

| #     | Tracker | Status         | Priority    | Subject   | Assignee            | Category | Target version | Has patch |
|-------|---------|----------------|-------------|---|---------------------|----------|----------------|-----------|
| 52419 | Bug     | New            | Should have | Wrong PHPDocs notation for default value inline f:translate viewhelper              |                     |          | 2.0            | No        |
| 52536 | Bug     | Under Review   | Should have | Errorclass not set if no property-attribute set                                     |                     |          |                |           |
| 48355 | Feature | New            | Could have  | Assign output of viewhelper to template variable for further processing.            |                     |          |                |           |
| 45345 | Feature | Needs Feedback | Should have | Easy to use comments for fluid that won't show in output                            |                     |          |                |           |
| 13045 | Bug     | New            | Should have | Entity decode of strings are different between if-conditions and output of variable |                     |          |                |           |
| 9514  | Feature | New            | Should have | Support explicit Array Arguments for ViewHelpers                                    |                     |          |                |           |
| 9005  | Feature | Accepted       | Could have  | Fluid Template Analyzer (FTA)   | Sebastian Kurfuerst |          |                |           |
| 60271 | Feature | New            | Should have | Paginate viewhelper, should also support arrays                                     |                     |          |                | No        |
| 58983 | Bug     | New            | Should have | format.date does not respect linebreaks and throws exception                        |                     |          |                | No        |
| 58921 | Bug     | New            | Should have | f:form.* VHs crash if NOT inside f:form but followed by f:form                      |                     |          |                | No        |
| 57885 | Bug     | New            | Must have   | Inputs are cleared from a second form if the first form produced a validation error |                     |          |                | No        |
| 56237 | Task    | New            | Should have | in-line (Condition)ViewHelpers should not evaluate on parsing                       |                     |          |                | No        |
| 55008 | Bug     | Under Review   | Should have | Interceptors should be used in Partials   | Christian Müller    |          |                | No        |
| 52640 | Feature | Under Review   | Should have | Create an UnlessViewHelper as opposite to the IfViewHelper                          | Marc Neuhaus        |          |                | No        |
| 52591 | Bug     | New            | Should have | The Pagination Widget broken for joined objects                                     |                     |          |                | No        |
| 51277 | Feature | New            | Should have | ViewHelper context should be aware of actual file occurrence                        |                     |          |                | No        |
| 50888 | Bug     | Under Review   | Should have | WSOD by changing name of section and if Fluid caches are generated                  |                     |          |                | No        |
| 49756 | Feature | Under Review   | Should have | Select values by array key in checkbox viewhelper                                   |                     |          |                | No        |
| 49038 | Bug     | New            | Must have   | form.select does not select the first item if prependOptionValue is used            |                     |          |                | No        |
| 47669 | Task    | New            | Should have | FormViewHelper does not define the default request method                           |                     |          |                | No        |
| 47006 | Bug     | Under Review   | Should have | widget identifier are not unique  |                     |          |                | No        |
| 46545 | Feature | New            | Should have | Better support for arrays in options of SelectViewHelper                            |                     |          |                | No        |
| 46091 | Task    | Needs Feedback | Should have | Show source file name and position on exceptions during parsing                     |                     |          |                | No        |
| 45153 | Feature | New            | Should have | f:be.menus.actionMenuItem - Detection of the current select option is insufficient  |                     |          |                | No        |
| 43071 | Task    | New            | Should have | Remove TOKENS for adding fallback templates in B                                    |                     |          |                | No        |
| 42743 | Task    | New            | Should have | Remove inline style for hidden form fields  |                     |          |                | No        |
| 42397 | Feature | New            | Should have | Missing viewhelper for general links  |                     |          |                | No        |
| 40081 | Feature | New            | Should have | Allow assigned variables as keys in arrays  |                     |          |                | No        |
| 38130 | Feature | New            | Should have | Checkboxes and multiple select fields should have an assignable default value       |                     |          |                | No        |

| #     | Tracker | Status         | Priority    | Subject  | Assignee            | Category | Target version | Has patch |
|-------|---------|----------------|-------------|--|---------------------|----------|----------------|-----------|
| 37095 | Feature | New            | Should have | It should be possible to set a different template on a Fluid TemplateView inside an action               | Christopher Hlubek  |          |                | No        |
| 33215 | Feature | New            | Should have | RFC: Dynamic values in ObjectAccess paths  |                     |          |                | No        |
| 28554 | Bug     | New            | Should have | (v4) implement feature flag to disable caching   |                     |          |                | No        |
| 28553 | Bug     | New            | Should have | improve XHProf test setup  |                     |          |                | No        |
| 28552 | Bug     | New            | Should have | (v5) write ViewHelper test for compiled run; adjust functional test to do two passes (uncached & cached) |                     |          |                | No        |
| 28551 | Bug     | Accepted       | Should have | (v4) backport VHTest   | Sebastian Kurfuerst |          |                | No        |
| 28550 | Bug     | New            | Should have | (v4) make widgets cacheable, i.e. not implement childnodeaccess interface                                |                     |          |                | No        |
| 28549 | Bug     | New            | Should have | make widgets cacheable, i.e. not implement childnodeaccess interface                                     |                     |          |                | No        |
| 5636  | Task    | Under Review   | Must have   | Form_RadioViewHelper and CheckBoxViewHelper miss check for existing object before it is accessed.        |                     |          |                | No        |
| 3291  | Feature | Needs Feedback | Should have | Cacheable viewhelpers  |                     |          |                | No        |
| 36559 | Feature | New            | Could have  | New widget progress bar  |                     |          |                | Yes       |
| 4704  | Feature | New            | Should have | Improve parsing exception messages   |                     | Core     |                |           |
| 1907  | Feature | New            | Could have  | Default values for view helpers based on context   |                     | Core     |                |           |
| 46257 | Feature | Under Review   | Should have | Add escape sequence support for Fluid  |                     | Core     |                | No        |
| 39990 | Bug     | New            | Should have | Same form twice in one template: hidden fields for empty values are only rendered once                   |                     | Core     |                | No        |
| 33551 | Bug     | New            | Must have   | View helper values break out of a partial scope  | Sebastian Kurfuerst | Core     |                | No        |
| 33394 | Feature | Needs Feedback | Should have | Logical expression parser for BooleanNode  | Tobias Liebig       | Core     |                | No        |
| 30555 | Feature | New            | Could have  | Make TagBuilder more extensible  |                     | Core     |                | No        |
| 27607 | Bug     | New            | Must have   | Make Fluid comparisons work when first element is STRING, second is NULL.                                |                     | Core     |                | No        |
| 12863 | Bug     | New            | Should have | Attributes of a viewhelper can't contain a '-'   | Sebastian Kurfuerst | Core     |                | No        |
| 10472 | Feature | New            | Could have  | Fluid Standalone distribution  |                     | Core     |                | No        |
| 3481  | Bug     | New            | Should have | Use ViewHelperVariableContainer in PostParseFacet  |                     | Core     |                | No        |
| 51239 | Bug     | Under Review   | Must have   | AbstractViewHelper use incorrect method signature for "\$this->systemLogger->log()"                      | Adrian Föder        | Core     |                | Yes       |
| 32035 | Task    | New            | Should have | Improve fluid error messages   |                     | Core     |                | Yes       |
| 7608  | Feature | New            | Could have  | Configurable shorthand/object accessor delimiters  |                     | Core     |                | Yes       |
| 62346 | Feature | New            | Could have  | f:comment should have high precedence  |                     | Core     | 3.x            | No        |

| #     | Tracker | Status         | Priority             | Subject   | Assignee                 | Category    | Target version | Has patch |
|-------|---------|----------------|----------------------|---|--------------------------|-------------|----------------|-----------|
| 60181 | Feature | New            | Could have           | Caching mechanism for Fluid Views/Templates   |                          | View        |                | No        |
| 45394 | Task    | New            | Should have          | Forwardport Unit test for standalone view   |                          | View        |                | No        |
| 43072 | Task    | New            | Should have          | Remove TOKENS for adding templates fallback in Backporter   |                          | View        |                | No        |
| 38369 | Bug     | New            | Must have            | Resource ViewHelpers should not fall back to request package  |                          | View        |                | No        |
| 8989  | Feature | Needs Feedback | Could have           | Search path for fluid template files  |                          | View        |                | No        |
| 46289 | Bug     | Needs Feedback | Should have          | Enable Escaping Interceptor in XML request format   |                          | View        | 2.0.1          | No        |
| 40998 | Bug     | Under Review   | Should have          | Missing parent request namespaces in form field name prefix   | Sebastian Kurfuerst      | ViewHelpers | 1.1.1          | No        |
| 36662 | Bug     | Needs Feedback | Should have          | Checked state isn't always correct when property is collection                                      | Kevin Ulrich Moschallski | ViewHelpers | 1.1.1          | No        |
| 9950  | Task    | New            | Should have          | Binding to nested arrays impossible for form-elements   |                          | ViewHelpers |                |           |
| 65424 | Bug     | Under Review   | Should have          | SelectViewHelper must respect option(Value Label)Field for arrays                                   |                          | ViewHelpers |                | No        |
| 60003 | Feature | New            | Should have          | Add required-Attribute to f:form.password   |                          | ViewHelpers |                | No        |
| 59057 | Bug     | Under Review   | Must have            | Hidden empty value fields should be disabled when related field is disabled                         | Bastian Waidelich        | ViewHelpers |                | No        |
| 54284 | Bug     | New            | Should have          | Default Option for Switch/Case VH   |                          | ViewHelpers |                | No        |
| 54195 | Task    | New            | Should have          | Rename and move FormViewHelper's errorClass value, currently 'f3-form-error'                        | Adrian Föder             | ViewHelpers |                | No        |
| 51100 | Feature | New            | Must have            | Links with absolute URI should have the option of URI Scheme  |                          | ViewHelpers |                | No        |
| 49600 | Bug     | New            | Should have          | f:form tag shown as a HTML on frontend  |                          | ViewHelpers |                | No        |
| 40064 | Bug     | New            | Must have            | Multiselect is not getting persisted  |                          | ViewHelpers |                | No        |
| 39936 | Feature | New            | Should have          | registerTagAttribute should handle default values   |                          | ViewHelpers |                | No        |
| 37619 | Bug     | New            | Should have          | Fatal Error when using variable in name attribute of Section ViewHelper                             |                          | ViewHelpers |                | No        |
| 36410 | Feature | New            | Should have          | Allow templates to send arguments back to layout  |                          | ViewHelpers |                | No        |
| 34682 | Bug     | Under Review   | Should have          | Radio Button missing checked on validation error  |                          | ViewHelpers |                | No        |
| 34309 | Task    | New            | Could have           | Unknown ViewHelpers cause exception - should be handled more graceful                               |                          | ViewHelpers |                | No        |
| 33628 | Bug     | Needs Feedback | Must have            | Multicheckboxes (multiselect) for Collections don't work  | Christian Müller         | ViewHelpers |                | No        |
| 26664 | Task    | New            | Won't have this time | Clean up Form ViewHelpers   |                          | ViewHelpers |                | No        |
| 26658 | Task    | New            | Won't have this time | Make Form ViewHelpers consistent  |                          | ViewHelpers |                | No        |
| 10911 | Task    | New            | Should have          | Tx_Fluid_ViewHelpers_Form_AbstractFormViewHelper->renderHiddenIdentityField should be more reliable |                          | ViewHelpers |                | No        |
| 8648  | Bug     | New            | Should have          | format.crop ViewHelper should support all features of the crop stdWrap function                     |                          | ViewHelpers |                | No        |

| #     | Tracker | Status         | Priority    | Subject   | Assignee            | Category    | Target version | Has patch |
